

LEAD RECRUITER TRAINING GUIDE

Monitor team performance, manage automation & SLA compliance

Role: Lead Recruiter | Audience: Team leads & senior recruiters | Version: 2026

Section 1: Dashboard Monitoring

Log in daily and check these key metrics on your lead dashboard:

Metric	What It Shows	Target
Open Jobs	Active job requirements	Know each JD in detail
Candidates	Total profiles in your pipeline	Keep it updated daily
Pipeline	Candidates across all stages	No stale entries > 7 days
SLA Breaches	Jobs/candidates past time limits	Must be zero each morning
Placed/Month	Successful placements this month	Track against team target

Section 2: Automation Rules

The ATS runs these automated rules every hour. Understand them so you can audit exceptions:

Rule Name	Trigger Condition	Action Taken
Auto-Screen	Experience >= 4 years (48 months)	Move to SCREENED automatically
Auto-Submit	AI match score >= 50%	Flag for submission review
Auto-Interview	AI match score >= 65%	Schedule interview prompt sent

Note: Automation rules do not replace human review. Always validate before final submission to client.

Section 3: Copilot Priority Queue

The AI Copilot surfaces the following priority items at the top of your dashboard each morning:

Priority	What It Means	Action
Submit Today	Profiles ready for client submission	Review and send immediately
Follow Up	Awaiting response > 48 hours	Call or message the client
At Risk	SLA approaching breach in < 4 hours	Escalate or reassign
Interviews	Interviews scheduled in next 24 hours	Confirm with candidate & client
Offers	Offers pending acceptance > 48 hours	Follow up, push for closure

Section 4: SLA Status Monitoring

Status	Colour Indicator	Meaning	Action Required
OK	Green	Within SLA time limit	No action needed
WARN	Yellow	Approaching SLA breach (< 4h)	Prioritise immediately
BREACH	Red	SLA time limit exceeded	Escalate to manager now
